

# YESBIR SINGH

Software Engineer

+91 8882956332 • yesbirs07@gmail.com • Delhi, India

## PROFESSIONAL SUMMARY

Results-driven **Full-Stack Software Engineer** with **5+ years of experience** building scalable web applications using **React.js, ASP.NET Core, C#, and SQL Server**. Proven track record driving **AI-powered developer tooling** — custom LLM agents and MCP server integrations — that cut review overhead by 40% and accelerate delivery. Skilled in cross-functional collaboration, code quality leadership, and mentoring Agile/Scrum teams.

## TECHNICAL SKILLS

|                 |                                                                       |
|-----------------|-----------------------------------------------------------------------|
| Frontend        | React.js, React Redux, JavaScript (ES6+), HTML5, CSS3                 |
| Backend         | ASP.NET Core, C#, Python, Entity Framework Core, REST APIs            |
| Databases       | SQL Server, Query Optimisation, Stored Procedures                     |
| AI & Automation | LLM Agent Development, MCP Server, Prompt Engineering, AI Code Review |
| DevOps & Tools  | GitLab, GitHub, CI/CD Pipelines                                       |
| Testing         | NUnit, Unit Testing, TDD, QA Collaboration                            |
| Methodologies   | Agile/Scrum, Full-Stack Dev, Code Review Leadership, Mentoring        |

## PROFESSIONAL EXPERIENCE

### Software Engineer

#### Bhavna Software's

April 2021 – Present | Delhi, India

#### AI-Driven Development

- Designed and deployed a custom **AI-powered Code Review Agent** using LLM integration, reducing team code-review turnaround by **40%** and improving pull request consistency.
- Built an AI **Planning Agent** that analyses sprint stories, surfaces ambiguities, and auto-generates targeted stakeholder clarification questions before development begins.
- Architected a **custom GitLab MCP (Model Context Protocol) server** with the team, integrating AI tooling seamlessly into the existing CI/CD pipeline.

#### Engineering & Delivery

- Developed and maintained full-stack features with **React.js** and **ASP.NET Core / C#**, consistently delivering against sprint commitments.
- Led code reviews upholding high engineering standards, contributing to an **8% increase in code coverage** in a single quarter, reducing production defect rates.
- Partnered with QA to catch bugs early in the development cycle, reducing late-stage failures and improving release stability.
- Collaborated with clients on requirements and design specifications, minimising revision cycles.
- Mentored junior engineers via pair programming and knowledge-sharing sessions on React.js, C#, and clean-code practices.

## KEY PROJECTS

### Mortgage Credit Link

Client: Meridian Link | Stack: ASP.NET Core, React.js, SQL Server

- Led code review cadence to enforce best practices, reducing integration bugs and boosting post-release stability.
- Coordinated with QA for comprehensive feature test coverage, significantly reducing post-deployment incidents.

### E-Commerce Platform

Personal Project | Stack: React.js, ASP.NET Core, SQL Server, Stripe, PayPal

- Built full-featured platform with secure JWT-based authentication, product catalogue, and cart management.
- Integrated **Stripe and PayPal** payment gateways ensuring PCI-compliant transactions.
- Implemented admin dashboard for order and inventory management, reducing operator overhead.

## EDUCATION

### Bachelor of Technology (B.Tech)

#### Guru Gobind Singh Indraprastha University

June 2016 – August 2020 | Delhi, India

## KEY ACHIEVEMENTS

- 40% faster code reviews** — AI Code Review Agent shipped to production.
- 8% code coverage increase** — Code review initiative, single quarter.
- GitLab MCP server** — First AI-native CI/CD integration at Bhavna's.
- 5+ years full-stack** — React.js, ASP.NET Core, SQL Server at scale.
